

## Offering unrestrained possibilities for customization

Häcker Kitchens expands its color spectrum with the addition of an astonishing 1,900 NCS shades

(Miami, FL) January 2023.

Häcker Kitchens, the leading German manufacturer of modern kitchen cabinetry, expands its paint expertise, offering 1,900 NCS (Natural Color System®) custom shades for use with its collections. Häcker Kitchens' NCS addition delivers a significantly higher degree of individualization.

As the demand for color coordinated and uniform kitchen and living room furniture continues to increase, with both the RAL and NCS color systems, customers have the option to match their new kitchen to the furnishings and interior of their home.

In addition to Häcker Kitchens' original 190 RAL colors, NCS adds 1,900 custom shades for the design and creation of unique and specialized looks in kitchen design. All colors offered in the extensive spectrum can be applied throughout all product lines including: lacquered fronts, visible sides, plinths, cornices and light strips, as well as for all elements in the entire environment.

Häcker Kitchens uses its own state-of-the-art painting systems, ensuring a consistent focus on quality and a high level of safety can be maintained, in conjunction with the Häcker test laboratory. In line with its in-house sustainability standards, Häcker Kitchens also uses only water-based paints that produce 90% less solvents.
